Model No. 2, No. 2T
Ball-type Washing Machine Shutoff Valve

**WARNING**

Read this Manual BEFORE using this equipment.
Failure to read and follow all safety and use information can result in death, serious personal injury, property damage, or damage to the equipment.
Keep this Manual for future reference.

Installation Instructions

1. No. 2 features ½" solder or compression adapters.
   No. 2T features ½" solder or male thread adapters.

2. Disassemble adapters and remove O-rings prior to soldering.

3. Install a minimum of 3" (76mm) above top of washing machine. Ell adapters can be orientated to top, bottom or side.

4. Pipe connections are 2¾" (60mm) on center.

**Model M2 identification shown on body casting.**

*WARNING*

Teflon® is a registered trademark of the E.I. Dupont de Nemours & Company, Incorporated.
Maintenance

1. Shutoff water supply and loosen adapter screws to remove valve.
2. Remove O-rings and screws from adapters.
3. Move lever to on position and unscrew from spindle.
4. Use ⅜" allen wrench to remove hose adapters and remove bottom Teflon® discs. This allows removal of the balls from the spindle by shaking slightly.
5. Insert a pencil through rear of valve to pry upper Teflon® discs loose.
6. To replace spindle O-rings, use ¼" allen wrench to remove side plug.
7. Reassemble by replacing all seals, assembling in reverse order. Tighten adapters securely to avoid leakage.
