Temperature & Pressure Relief Valves

T&P Relief Valves on this page are certified by CSA and meet current F.H.A. requirements and American National Standard Z21.22.

Standard Relief Valve Settings:

Due to excessive costs of producing non-standard "special" settings in small quantities, we find it necessary to limit available pressure relief settings to 75,100,125,150psi. Temperature 210°F.

If "special" settings are necessary for large quantity requirements, we will approve pricing at little or no extra cost, depending on type of valve, setting and quantity. Please consult factory.
