

Bronze Ball Valves with Stainless Steel Trim

Full Port Design
Full Range Sizes

Watts Lead Free* Bronze Ball Valve series with stainless steel trim are suitable for commercial and industrial applications handling a full range of liquids and gases, including potable water. Features include a blowout proof, pressure retaining stem and a full-port orifice yielding minimal pressure drop. Multiple models are available with solder or NPT end connection.

In particular, the LFB6080G2-SS and LFB6081G2-SS series is Buy American Act (BAA) compliant. The LFB6090-SS and LFB6091-SS series is available in import. Both series are certified to NSF 61 for potable water applications and certified to NSF 372 for lead free requirements.

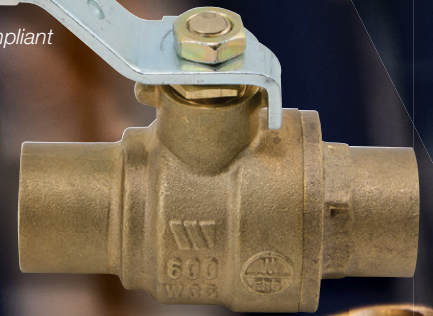

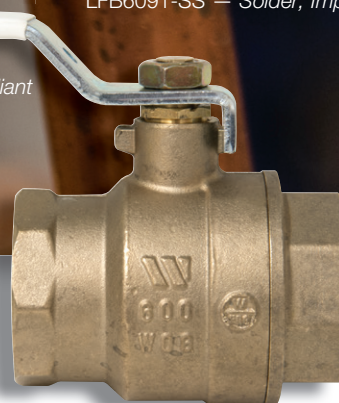

Additional features include:

- 316 Stainless steel ball & stem
- Lead Free* forged bronze body and adapter
- Full range of sizes from 1/4" to 4"
- Adjustable stem packing gland
- White handles for quick Lead Free* identification
- 100% Factory tested in USA

**The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.*

LFB6080G2-SS — Threaded, BAA compliant
LFB6090-SS — Threaded, Import

LFB6081G2-SS — Solder, BAA compliant
LFB6091-SS — Solder, Import

Visit watts.com for BAA information on specific models.
