

# RainCycle™

## RAINWATER HARVESTING SYSTEM

### Saving the Planet, One Drop at a Time

With over 140 years of water industry experience, Watts provides the knowledge, expertise, and product selection needed to harvest and use rainwater. We design and manufacture efficient solutions to capture and use the only commodity for which there is no economic alternative—water.

Watts RainCycle™ systems collect, pre-filter, store, filter, and treat roof-collected rainwater for non-potable end uses thus integrating the rainwater system functions in a single package.

- Stainless-steel piping & frame
- Modular design & customization
- HMI touch screen display
- Integrated IoT & connection to BMS
- System startup, owner training, and technical support
