FloodProtectionSystem](https://Watts.com/FloodProtectionSystem)

WATTS®

FLOODING IS EXPENSIVE.
PROTECTION ISN'T.

THE NEW STANDARD FOR PLUMBING

Connected technology and internet-enabled products are not the future. They're here.

SentryPlus Alert™ Technology by Watts uses these innovations to detect and protect against excessive Reduced Pressure Zone (RPZ) discharge.

Detect excessive backflow relief valve discharge. | **Notify** with wireless multi-channel alerts. | **Protect** with automatic shutoff.

SentryPlus Alert™

TECHNOLOGY

Multiple wireless alerts

Receive alerts no matter where you are. SentryPlus Alert™ Technology will send notifications via text, email, and a phone call.

Upgrade with ease

With four configurations, Watts offers the only connected flood protection system that can easily upgrade any existing RPZ backflow preventer to have flood detection and/or protection capabilities.

Return on investment

The average commercial flood claim is \$75,000**. This system is a simple, cost-effective solution to protect against what could be a costly catastrophe.

Peace of mind

Know what you need to know the second you need to know it. SentryPlus Alert™ Technology lets you be there even when you're not.

Protection

SentryPlus Alert™ Technology works with an automated shutdown valve to stop flooding before it starts.

The first system that offers automated flood protection.

In addition to detection, it protects your property by automatically shutting off the water supply in the event of an excessive backflow discharge.

- AUTOMATED RESPONSE
- WORKS IN REAL-TIME
- HELPS PROTECTS AGAINST FLOODING

FOUR CONFIGURATION OPTIONS*

Four configuration options for flexibility when specifying, installing, or upgrading systems. Optional strainer with downstream shutoff available.

Flood Protection and Detection*

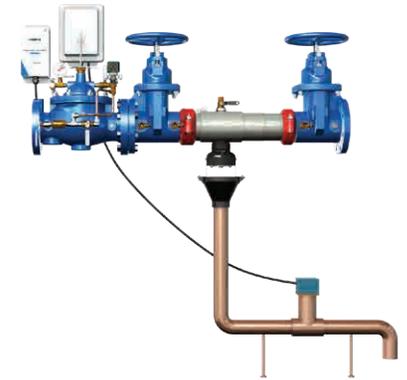

SentryPlus Alert™
TECHNOLOGY

OPTION

1

Flood Protection Backflow System

Backflow preventor with automated flood protection shutdown valve

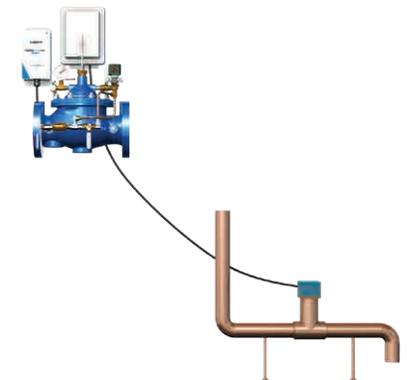

OPTION

2

Flood Protection Shutdown Valve

Automated shutdown for use with any RPZ backflow preventer

*does not come with copper piping

Detection

SentryPlus Alert™ Technology notifies you in real-time when excessive relief valve discharge from the backflow preventer is detected.

Get the vision you need to take control of your water system.

This technology allows your backflow preventer do its job while providing cost-effective detection and notification.

- CONTINUOUS CONDITION MONITORING
- MULTI-CHANNEL ALERT
- WORKS WITH ANY RPZ BACKFLOW PREVENTER

FOUR CONFIGURATION OPTIONS*

Four configuration options for flexibility when specifying, installing, or upgrading systems. Optional strainer with downstream shutoff available.

Flood Detection Only*

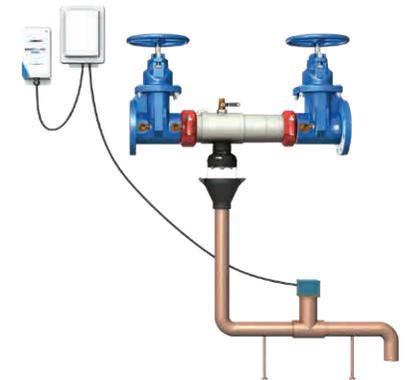

SentryPlus Alert™
TECHNOLOGY

OPTION

3

Flood Detection Backflow System

Backflow preventor with flood detection system

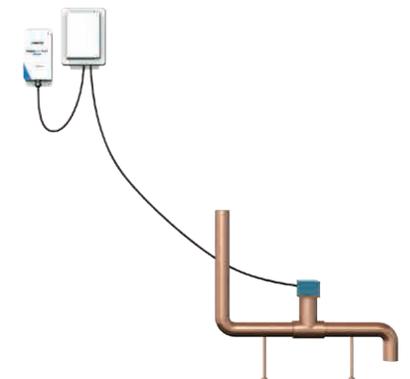

OPTION

4

Flood Detection Upgrade Kit

For use with any RPZ backflow preventer

*does not come with copper piping

Controlling the power of water for 140 years.

Watts is a trusted provider of connected water and heating solutions. Watts offers one of the broadest ranges of systems and solutions designed to increase safety, energy efficiency, and water conservation in residential, commercial, and industrial applications.
