

Watts ISCA-101

Industry Standard Water Closet Carriers Outperform Zurn® Models

In a third-party independent lab test by QAI Laboratories, Watts ISCA-101-R 3" and 4" water closet carriers, with their proprietary compression seal, outperformed both the Zurn Z1201-NR3 and Zurn Z1201-NR4 water closet carriers in carry distance tests.

- Watts ISCA-101-R with a compression connection and a 3" outlet had a weighted average carry distance of over two feet more than the comparable Zurn model with a 3" outlet.
- Watts ISCA-101-R with a compression connection and 4" outlet had a weighted average carry distance of 50.71 feet, nearly one foot more than the comparable Zurn model with a 4" outlet and almost 3 feet more than the 3" Zurn model.

Zurn® is a registered trademark of Zurn Industries, LLC.

Model Tested in a 60' Run	Average Weighted Carry Distance (in feet)	Delta (in feet)
Watts ISCA-101-R with 3" outlet	50.24	2.14
Zurn Z1201-NR3 with 3" outlet	48.10	-2.14
Watts ISCA-101-R with 4" outlet	50.71	0.95
Zurn Z1201-NR4 with 4" outlet	49.76	-0.95

The ISCA-101 Industry Standard single horizontal adjustable compression water closet carrier with epoxy coated cast iron fitting has been shown to provide greater weighted carry distances with 3" and 4" outlets. To ease installation, the ISCA-101 is designed with left, right, and double fittings, and for easy adjustment to standard and wheelchair height.

Features include:

- Compression connection epoxy coated cast iron fitting and foot supports for smooth finish and long life
- Single closet flexibility and no hub waste and no hub vent connections for easy installation
- Legs embossed with incremental markings to easily match height to commonly used fixtures
- Adjustable ABS nipple with integral test cap and neoprene bowl gasket for convenience
