The 3-Way Brass Mixing Valve 713 is used to mix supply water from a hydronic source with water returning from a system. It is designed for use in either closed loop or open loop hydronic systems. This 3 -way valve has standard female NPT threads, as well as a maximum leak through rate of $1 \%$ to allow for water expansion during temperature changes. The valve position can be manually set using the handle. An Actuating Motor 741 can be used to automatically operate the valve.

## Specifications

3-Way Mixing Valve 713 1-1/2" Brass

| Literature | D710 |
| :--- | :--- |
| Packaged Weight | $6.7 \mathrm{lbs}(3084 \mathrm{~g})$ |
| Maximum operating <br> pressure | $146 \mathrm{psi}(10 \mathrm{bar})$ |
| Operating <br> temperature range | -20 to $248^{\circ} \mathrm{F}\left(-28\right.$ to $\left.120^{\circ} \mathrm{C}\right)$ |
| Valve body and vane | CW 617N - EN 12165 Brass |
| Shaft seal | EPDM Peroxide "O" ring |
| Main seal | EPDM Peroxide "O" ring |
| Warranty | Limited 3 Year (See D710 for full warranty) |

## Features

- 3-Way Mixing Valve
- Brass construction to resist corrosion
- 1-1/2"

| Type | Pipe Size | CV Value | Dimension H | Dimension W | Packaged Weight |
