

Your Single Source

Commercial & Industrial Water Treatment Solutions

Your Single Source for Custom Water Treatment Solutions

Your industrial and commercial customers count on you to deliver integrated, turnkey water treatment solutions.

Standard or custom projects—Watts delivers! Our manufacturing expertise covers the entire process for assembling a water treatment solution, from design, engineering, and specification to manufacturing, skid mounting, preplumbing, and delivery.

The Result: One source for efficiently engineered high-quality systems, and assistance with installation and start up.

Pre-plumbed and Skid Mounted Twin Progressive Flow Water Softener

Experts in Water Treatment Technology

- Water filtration, softening, conditioning, and purification technologies
- Reverse osmosis, media filtration, ion exchange, cartridge filtration, and more
- Dedicated design and sourcing support
- Knowledge of industry codes and standards
- Dedicated engineering staff for custom designs
- State-of-the-art 2D and 3D software

Parallel 36" x 72" Quad Micro Z[®] Filter System

Parallel 48" x 72" Quad Carbon Filter

Custom Skid Mounted Pre-plumbed Cartridge Filter System

Highest Quality Manufactured Components

- Highest quality tanks, valves, and piping
- Manufactured locally for quick & cost-effective delivery
- Unmatched inventory for reduced lead times

Spanning Multiple Industries

We can design, manufacture, and assemble water treatment solutions for large-scale industrial and/or commercial projects across a wide range of industries:

- Agricultural & irrigation
- Chemical & industrial processing
- Commercial laundries
- Food, beverage & ice production
- General potable water
- Government & institutional
- Hospitals, medical & laboratory facilities
- Hotels & resorts
- Metal plating & surface finishing
- Municipalities & utilities
- Paper & pulp manufacturing
- Petroleum, gas & mining
- Pharmaceuticals & cosmetics
- Power & steam generation
- Textiles, ink & dye manufacturing
- Universities & educational facilities

System Shown with Optional Propress® Fittings
Propress® is a registered trademark of Viega GmbH & Co.

Skid Mount → Preplumb → Prewire → Deliver

Dual RO Systems with a Production of 110 gpm Each with Antiscalant Chemical Feed

Watts' Capabilities

Manufacturing capabilities define the ability to meet demanding specifications for commercial and industrial projects. Our capabilities include:

- Fiberglass tank sizes up to 48"X72"
- Carbon steel tank sizes up to 72"X72"
- ASME stamped fiberglass and steel tank options available
- Top Mounted, Side Mounted control valves and diaphragm valve nest options available
- Sch 80 PVC, Galvanized, Copper face piping up to 4"
- PVC Headers up to 6"
- Reverse Osmosis Systems 150 GPD to 120 GPM

Multi-tank Parallel OneFlow® Scale Control System
