UNLOCK CONTROLLER SIMPLICITY

OCKSMITH

LOCKSMITH[™]

Commercial Softeners & Backwashing Filtration Systems

Scan to Learn More **WWATTS**®

The Key to Controller Simplicity

Why sell the same water conditioning system as the competition when it offers fewer features, less functionality, and lower performance? Watts commercial softening and filtration systems now come standard with advanced, user-friendly LOCKSMITH[™] controllers, designed to streamline the operation and maintenance of your customer's system without the hassle of multiple platforms or additional system controllers.

COMPREHENSIVE SOLUTIONS

Available on a broad range of 1.5" & 2" softeners and backwashing filters

HIGHLY CONFIGURABLE Customizable programming easily tailored to your application

EASY-TO-MAINTAIN

Automatic alerts, minimal moving parts, single-tool servicing

PROGRESSIVE FLOW CAPABLE

Eliminates the need for costly additional system controllers

Powered By LOCKSMITH™

METERED WATER SOFTENER SYSTEMS			
Valve Size	Type of System		
1.5"	Simplex Softeners		
2.0"	 Duplex Alternating Softeners Duplex Progressive Softeners Triplex Progressive Softeners Quadplex Progressive Softeners 		

BACKWASHING FILTRATION SYSTEMS

Valve Size	Type of System	
1.5"	Filox® Filters for Iron, Hydrogen Sulfide, & Manganese Reduction	
2.0"	 Activated Carbon Filters for Chlorine, Taste, & Odor Reduction Micro Z[®] Filters for Sediment & Suspended Solids Removal 	

LOCKSMITH[™] Board Overview

Controller Capabilities

Service Company Contact Screen

Displays service company name and contact info for scheduled maintenance or in the event of an error. Able to be serviced with just one tool.

Low Salt Alarm

Alerts user when salt levels in the brine tank are below the salt alarm threshold.

Progressive Flow Capabilities

Operate up to 4 systems in progressive mode with no costly additional system controllers required.

More MAV Options

Including No Hard Water Bypass, Progressive Mode, Separate Source Regeneration, Alternating Systems, and Brine Reclaim.

More Relay Options

Dual outputs allow for the operation of multiple external devices.

Proportional Up-Flow Brining Option

Regenerate only the exhausted portion of the resin bed and reduce salt usage.

Components

- 1. Battery Backup 3V CR2032
- 2. Remote Start Regeneration
- 3. Relay 1 12VDC 100 mA
- 4. Relay 2 12VDC 100 mA
- 5. Drive Motor
- 6. Auxiliary MAV
- 7. Alternating MAV
- 8. Valve-to-Valve Communication Port
- 9. Power Connection
- 10. Meter Connection

The LOCKSMITH[™] Difference

When it comes to features, functionality, and performance, we've got it on lock.

Features and Capabilities	Standard EE Board	LOCKSMITH™		
SOFTWARE				
Air Induced Oxidation (AIO)	~	~		
Upflow Proportional Brining		~		
Alternating Tank Pre-Rinse Before Placing into Service	~	~		
Service Alarms (Time & Volume)		~		
Salt Level Displayed on Home Screen		~		
Low Salt Alarm		~		
Service Company Name & Phone Number on Home Screen		~		
Diagnostics & History Screens	√	~		
Completely Adjustable Regeneration Cycle Times	~	~		
HARDWARE				
Meters: 1"-2" & Programmable Generic Meter K Factor	~	~		
Two Output Relays for Volume, Time, Low Salt & Error		~		
Two Motorized Alternating Valve Drivers for No Hard Water Bypass, Separate Source Backwash, Time, Progressive Flow, & Alternating Valves		~		
Remote Regeneration Input	✓	~		
Custom Multi-Color LCD Screen		~		
Energy Saver Mode		~		

Water the Way It Should Be

Your Commercial Water Technology Partner for 150 Years

Deliver your customers confidence in their water, no matter the application. A trusted innovator in water technology for 150 years, Watts is widely recognized as the benchmark in treatment and conditioning solutions. From softening and filtration to specialty media and custom engineered solutions, the future of water quality flows through Watts.
