Energy Efficiency

Key Highlights

Syncta is a cloud-based software solution that simplifies the backflow testing process by offering digital tools for data entry, scheduling, and compliance tracking. It helps backflow testers adhere to regulations more efficiently by streamlining the testing life cycle. Syncta also eliminates paperwork by allowing electronic submission of test results, saving an average of 1,300 sheets of paper annually for testers and 5,200 sheets for water purveyors yearly. Its mobile-friendly design and flexible pricing make it accessible for businesses of all sizes.

Backflow Testers

Average Backflow Tester saves:

1,300 sheets of paper yearly

168,000 BTUs of energy

128 gallons of water

118 lbs CO2 emissions

Water Purveyors

Average Water Purveyor saves:

5,200 sheets of paper yearly

670,000 BTUs of energy

512 gallons of water

472 lbs of CO2 emissions
