

Stainless Steel Butterfly Valves

Ideal for Industrial Applications

Shown with
Lever Handle
for 2 to 6 IN

Shown with
IPX8-rated Gear Operator
for 2 to 12 IN

NEW SERIES 94

High-Performance Double Offset Butterfly Valves

Precisely manage flow and pressure with stable, efficient control of liquids, gases, and slurries. Engineered to reduce turbulence and maintain system performance in demanding applications.

- Stainless-steel body and trim offer superior corrosion resistance
- Double offset disc design minimizes friction and seat wear, extending valve service life
- Bidirectional, zero leakage RPTFE seat with patented retainer ring delivers tight shutoff and reliable performance up to 500°F
- Lever handle available in 2 to 6 IN or IPX8-rated gear operator for watertight protection available in 2 to 12 IN
- All sizes rated for Class 150

Local inventory available stateside to support quick deliveries.
