# Stainless Steel Ball Valves

Ideal for Industrial Applications

## **NEW Series S-6800, S-6801 and S-6802** 3-Piece, Full Port Ball Valves

In-line maintenance design enables servicing of all operating components without disrupting the piping system in industrial applications. Available with threaded, socket weld, and butt weld end connections. Ideal for both water and glycol systems.

- 3-piece, lift-out design makes maintenance easy
- Full port orifice ensures maximum flow capacity
- Stainless steel body, ball, stem and handle offer superior corrosion resistance
- Blow-out proof, pressure retaining stem withstands highest operating pressure
- Carbon/glass reinforced PTFE Durafill® seat extends valve service life
- All connections available in 1/4 IN to 2 IN

**Local inventory available stateside to support quick deliveries.**
