IN SECONDS**

**WATTS®**

# A Patented Upgrade from the Innovators of the 4-Port Mixing Valve

## Under Sink Guardian® with NEW Cross Sense™ Indicator

Replacing point-of-use mixing valves is a time and labor-intensive hassle. Quickly identify cross flow and repair the fouled valve with the *first ever* point-of-use mixing valve featuring a visual diagnostic indicator and replaceable strainer cartridge— cutting repair times and saving money over the course of the valve's lifetime.

### QUICKLY REPAIR FOULED VALVES

Explore how you can stop replacing entire valves with just one simple strainer cartridge replacement.

### EASILY IDENTIFY CROSS FLOW

Take a closer look at the Cross Sense™ indicator – the industry's first visual diagnostic technology
