

Cast Iron Swing Check Valves

Ideal for Data Centers & Municipalities

NEW SERIES 411

Engineered for Efficiency, Safety, and Easy Integration

Specifically designed to meet the demands of large-scale piping systems by automatically preventing reverse flow and protecting your mission-critical infrastructure from contamination.

- **Full Port, Low-Pressure Drop Design:** Ensures maximum flow efficiency without compromising system pressure.
- **Exceptional Reliability:** Offers the strength of flanged connections while providing the advantages of a resilient seat.
- **Corrosion Resistant:** NSF certified epoxy coating and lead-free bronze components provide superior durability and long service life.
- **Built for Safety & Quality:** Compliant with AWWA C508 standards for potable water applications.
- **In-Line Serviceability:** Designed for low maintenance and easy in-line repairs, minimizing downtime.

Available in 2 to 12 IN
