

Stay Ahead of Pressure Changes with Intelligent Monitoring

Sensor Control Monitor Connection Kit
for Automatic Control Valves

Enhanced Visibility for Proactive Infrastructure Management

The Smart ACV Sensor Control Monitor (SCM) Kit delivers real-time pressure monitoring for automatic control valves, with actionable insights and instant alerts on inlet and outlet pressure changes. It integrates seamlessly with BAS or SCADA via Modbus or connects to Nexa™ via Wi-Fi for remote monitoring and performance tracking.

- ✓ Accelerated Operational Response
- ✓ Enhanced Decision-Making Accuracy
- ✓ Reduced Field Diagnostic Time
- ✓ Improved Visibility into Pressure Behavior

Unlock Smarter Infrastructure with Connected Monitoring Capabilities

Pressure visibility

Alarm notifications

Remote management

Kit Includes:

Compatible ACV Models

Pressure Reducing Valve(LFM115 / LFF115)

Pressure Reducing Valve with Low Flow Bypass (LFM115-74 / LFF-74)

Pressure Reducing Valve with Surge Protection (LFM115-7/ LFF115-7)

Pressure Reducing Valve with Pressure Sustaining(LFM115-2 / LFF115-2)

Pressure Relief/ Sustaining Valve (LFM116 / LFF116)

Altitude Control Valve (LFM127 / LFF127)
