Stay Connected to Your Sprinkler System

Introducing SentryPlus Alert™ the
FIRST flood detection system
for fire applications

**Connected technology and
IoT-enabled products are not
the future. They're here.**

Ames® backflow preventers with SentryPlus Alert™ Technology is the first flood detection system to detect excessive Reduced Pressure Zone (RPZ) discharge in fire sprinkler applications.

- Continuously monitors for potential catastrophic flood condition
- Provides real time multi-channel alerts: call, text, email
- Available as an upgrade kit to retrofit to any manufacturers backflow preventer, or in conjunction with an Ames backflow preventer
- Can be installed without turning the water off or disrupting service
- Does not impact backflow preventer agency approvals
