WATTS®

Pre-drilled Bolts

In order to avoid time consuming and costly drilling of flanges to properly tag backflow preventers, Watts NYC backflow preventers are supplied with four sets of 304 stainless steel bolts/nuts, with a 1/4" hole drilled axially through the bolt. These bolts/nuts are also available for flanges sizes 2 1/2"-10" in separate kits of 4.

Pre-drilled Bolts
Patent Pending

Discharge Control Plate

In order to more easily meet NYC rules on protecting against 8-hours of maximum RPZ discharge, an optional discharge control plate for the LF909 is available for valves sizes 4"-10". The discharge control plate comes with the hardware necessary to install it. The new discharge profile is available to the right.

Discharge Control Plate

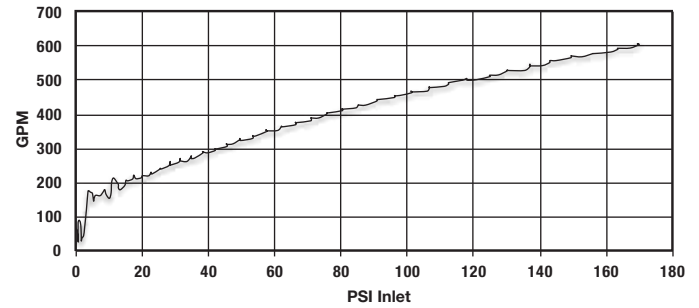

NYC Compliant Meter

Watts NYC models of the 709DCDA double check detector assembly utilize a Badger M35 meter. Consult Badger Meter for additional details or technical information.
