

Effortless, Energy-Efficient Heat Pump & Hybrid HVAC Control

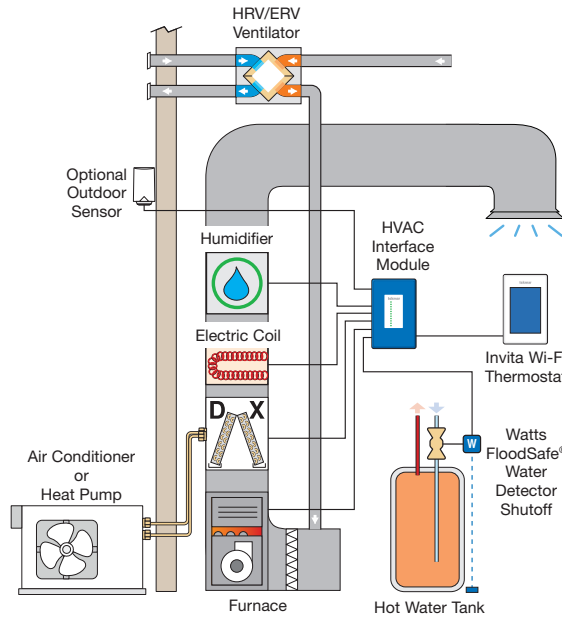

Deliver your customers smart thermostat upgrades and furnace to heat pump conversions without the hassle of pulling wire, patching walls or replacing batteries.

Invita® Wi-Fi Thermostat 564 is the all-in-one thermostat solution your customers need to effectively operate their new HVAC systems.

Better Design. Better Control. Better Systems.

The Invita Wi-Fi Thermostat now supports a new fault alert input for ERV (Energy Recovery Ventilator) systems—enabling real-time alerts. A simple dry-contact closure or fault signal from your ERV is wired into the Alert Input (Water Detect) on the Invita. Real-time Text, Push or email notification is sent via the Watts Home mobile app.

Invita meets the requirements of California Title 24, JA17.4 for a manufacturer certified ER/HRV Fault Indicator Display!

Invita®

Wi-Fi Thermostat 564

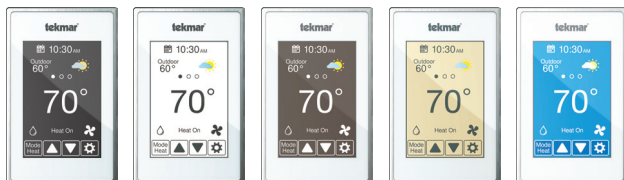

Energy Star Certified Product

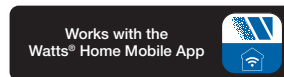

Wiring Worries are Over

Eliminate:

- Pulling new wires
- Patching & repainting walls
- Batteries
- Unreliable power stealing
- Unreliable wireless signals

Display color themes: black, white, espresso, latte & blue

Lack of Wires? No Problem! We Have You Covered

Invita® Wi-Fi Thermostat uses the existing 2-wires to connect the display in the living area to the HVAC Interface Module in the mechanical room.

Works With Most HVAC Systems

Conventional systems:

- Up to 2-stage heating, 2-stage cooling, fan and 2 accessories

Heat pump & dual fuel systems:

- Up to 4-stage heating, 2-stage cooling, fan, reversing valve and 1 accessory

Accessory options:

- Humidifier, dehumidifier, HRV/ERV ventilator

Peace of Mind

Pair your Invita™ WiFi Thermostat with a Watts FloodSafe® Water Detector Shutoff to help protect your home from catastrophic damage due to a water heater leak. The Floodsafe® Water Detector Shutoff (LFWDS) automatically shuts off the water and energy supply to your water heater if a leak is detected. Because the Watts Home app sends a notification to your mobile phone to notify you, repairs can be arranged without delay.
